

Transbeam Awarded Structured Fiber Backbone for Gold Wired Certified Building at 589 5th Avenue

One of the Most Desired New York City Addresses

New York, NY ([PRWEB](#)) July 28, 2015 -- [Transbeam, Inc.](#), a managed service provider of next generation data, voice, cloud and professional services, announced today they have completed both a copper and fiber network infrastructure upgrade at 589 5th Avenue, a 16-story commercial building, occupying 500,000 square feet on prestigious 5th Avenue in New York City. Building owner, Western Management Corporation recognized Transbeam for their technological superiority of providing a fully redundant, reliable and diverse backbone infrastructure.

Transbeam was one of seventeen service providers that had been invited to bid on the buildings project by way of a formal RFP process, managed by Velstar, a retained telecommunications consultant to Western Management. Transbeam was selected for their expertise in fiber based technology, network redundancy, resiliency and scalability of broadband services.

“Out of several service providers that submitted proposals, Transbeam demonstrated key competencies with both their engineering and project management teams that complimented well-known network presence in the NYC area,” stated Tony Ruggieri, Managing Partner at [Velstar](#).

“We are very honored to have been selected for this high standard project of designing and installing a new network infrastructure for 589 5th Avenue, one of the most popular landmark buildings in New York City,” stated Avner Nebel, Chief Operating Officer at Transbeam. “The intent of this project was to offer existing tenants a greater selection of telephone and Internet services based on next generation, fiber technology which historically our past carriers did not provide,” stated Ken Wentworth, Executive Vice President of Western Management Corporation. “We are very pleased with the responsiveness of Transbeam in delivering this upgraded infrastructure and contributing to our Gold-level Wired Certification.”
